Ha Dong District - Hanoi

CAREER GOAL

- Short-term goals (3 months 1 year):
- + Find a working position that matches your experience. Self-study the necessary skills to meet the job, aiming to become a full stack developer.
- + Use your own knowledge and experience to best meet the company's job requirements. With an understanding of web development principles and solid technical skills, I am dedicated to delivering high-quality software solutions.
- + Desire to expand relationships with many people and gain more working experience, learning the cultural beauty of the company.
- Long-term goals (over 1 year):
- + My long-term goal is not only to become an excellent developer but also to stick with the company for a long time, contributing to the company's technological development.
- + Strive for more advancement at work, taking on more important positions in the operation and development of the company.
